

MOHAMMED SAIF ALI

AWS Cloud Engineer / Linux Administrator

Hyderabad

CAREER OBJECTIVE

I am a recent B.E. graduate in Artificial Intelligence and Machine Learning, currently expanding my knowledge through an AWS-DevOps course, focusing on Linux System Administration and AWS technologies. With hands-on experience from internships in Data Analytics and AI/ML, I have honed my skills in problem-solving and data-driven decision-making. I am eager to apply my cloud and Linux expertise in a challenging role as an AWS Cloud Engineer or Linux Administrator

EDUCATION

B.E. in Artificial Intelligence and Machine Learning

Muffakham Jah College of Engineering and Technology

08/2021 - 05/2025 India

Intermediate (MPC)

Narayana Junior College IIT Campus

06/2019 - 06/2021 India

Secondary School (CBSE)

Sultan ul Uloom Public School

06/2007 - 06/2019 India

SKILLS

AWS	AWS Cloud	AWS EC2	Bootstrap
CloudWatch	Deep Learning	EC2	EFS
ELB	Git		
Java	Jupyter	Jupyter Notebook	Keras
Linux			
Matplotlib	NLP	Numpy	OpenCV
Pandas			
PyCharm	Python	Scikit-Learn	SNS
SQL			
TensorFlow	Ubuntu	Visual Studio	
Visual Studio Code	Windows Server	EBS

PROJECTS

JARVIS-Desktop Voice Assistant

01/2024 - 02/2024

A virtual assistant project leveraging AI technologies

- AI-powered virtual desktop assistant enables hands-free computer control through voice commands
- Implemented natural language processing for application control, web search, and file management
- Developed using Python with speech recognition libraries and integrated system automation scripts

MATHIFY-AI Powered Math Solutions

05/2024 - 07/2024

An AI-powered platform for solving math problems

- Platform uses AI and machine learning for math problem-solving
- Personalized learning with step-by-step solutions for all math levels
- SQL databases integrated for user management and solution history tracking

ATSS- Automated Traffic Surveillance System

04/2025 - 06/2025

A traffic surveillance system employing AI technologies for monitoring

- Developed AI-driven traffic monitoring using YOLOv8 for vehicle detection
- Implemented license plate recognition system with 95% accuracy for traffic enforcement
- Used Python, OpenCV for computer vision, and SQL databases for data management

TRAINING / COURSES

AWS-DevOps Course

Currently pursuing a course focused on gaining practical knowledge in Linux System Administration, AWS EC2, EBS, and ELB
